DETAILED ACTION

Status of Claims

1. Claims 11-20, filed April 27th, 2009, are currently under examination. Claim 11 has been amended by Examiner's Amendment below.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Danielle C. Sullivan on March 12th, 2010.

Start of Claim Amendments

Claim 11 (Currently Amended): A method for providing a zirconium alloy semi-finished product containing by weight at least 97% zirconium, intended for the production of at least one elongated product, comprising:

casting the zirconium alloy to produce an ingot with a diameter between 400 mm and 700 mm and a length between 2 m and 3 m;

~~Two-stage forging the ingot to produce the semi-finished product intended to be formed to obtain the elongated product, in a first stage to produce an intermediate product with a cross-section inscribed in a circle of diameter of between 250 mm and 400 mm~~ wherein ~~[[a]]~~ the first forging stage of the ingot is performed at a temperature at

Art Unit: 1793

which the zirconium alloy is in a state comprising the crystalline α and β phases of the zirconium alloy; ~~wherein a second forging stage follows the first forging stage,~~

forging, in a second forging stage, said intermediate product into a semi-finished product in the form of a rod or bar with a cross-section inscribed in a circle of diameter of between 100 mm and 250 mm, wherein β quenching does not occur between the said first and second forging stage; and

extruding or hot rolling the forged ingot.

End of Claim Amendments

Allowable Subject Matter

3. Claims 11-20 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 11, the closest prior art references of Sabol (EP 0.085.553) and Van Swam (US 5,835,550) do not teach forging in a first stage to form an intermediate product of the claimed size and then in a second stage to form a semi-finished product of the claimed size followed by hot rolling or extrusion. While Sabol discloses forging of an ingot of the claimed diameter in a temperature range including $\alpha+\beta$, Sabol then requires a beta quenching as prohibited by instant claim 11 and Van Swam does not provide motivation to avoid this step as Van Swam initially forges the zirconium ingot in a beta temperature range (col. 8, lines 54-67).

Art Unit: 1793

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark L. Shevin whose telephone number is (571) 270-3588 and fax number is (571) 270-4588. The examiner can normally be reached on Monday - Friday, 8:30 AM - 5:00 PM EST.
